DIPTESH KUMAR

dipteshsongara2004@gmail.com | (+91) 9950036179

EDUCATION

Indian Institute of Technology(IIT), Roorkee Aug 2023 – Present
Bachelor of Technology in Metallurgical and Materials Engineering(MMED)

Tilak Public School, Jaipur(India) April 2022 – March 2023
Class XII (Senior Secondary), CBSE Overall Percentage: 84.6%

EXPERIENCE

Frontend Developer, Future Intern Startup – Remote Aug 2024 - Sept 2024

- Develop and maintain web components using modern frontend technologies.
- Convert design mockups into high-quality code.
- Basic understanding of HTML, CSS, and JavaScript.

MERN Stack Developer, Zidio Development – Remote Sept 2024 - Oct 2024

- Develop and maintain full-stack web applications using the MERN stack.
- Build RESTful APIs and integrate them with frontend interfaces.
- Perform debugging, testing, and optimization to ensure high performance and responsiveness.
- Basic understanding of MongoDB, Express.js, React.js, and Node.js.
- Knowledge of Git and version control practices.

PROJECTS

Decentralized Voting App github.com/Voting-App

- Developed a secure, transparent voting dApp using **Solidity**, **Foundry**, and **Ethereum** smart contracts to ensure tamper-proof vote recording.
- Built a full-stack interface with **React.js**, **Tailwind CSS**, and **Ethers.js**, enabling real-time interaction with the blockchain.
- Deployed smart contracts to a testnet and conducted unit testing to validate vote integrity, user eligibility, and resistance to double voting.

ChainCart - Full-Stack Blockchain E-Commerce Platform github.com/chaincart

- Built smart contracts for escrow payments and product listings, reducing fraud by 100
- Developed a responsive frontend with MetaMask integration, enabling crypto transactions.
- Designed a Node.js backend with IPFS for off-chain data storage, cutting gas costs by 40
- Tools: Foundry, ethers.js, TailwindCSS, GitHub Actions.

Foundry-Account-Abstraction github.com/aa

- Architected ERC-4337-compliant AA contracts (EntryPoint, Paymaster) to enable gasless transactions and batched ops, reducing costs by 40
- Tools Used: Solidity, Foundry, Ethers.js, Alchemy RPC, Metamask.

Krypt Transaction App - KryptAppURL github.com/kryptApp

- Developed a decentralized Ethereum-based transaction platform that enables users to send ETH and attach messages with GIFs in real time.
- Built and deployed smart contracts using **Solidity** and **Foundry**, implementing transaction history, metadata logging, and blockchain interaction logic.
- Tools Used: React.js, Tailwind CSS, Ethers.js, Solidity, Foundry, Vite ,Metamask

TECHNICAL SKILLS

Blockchain: Solidity, Foundry, Ethers.js, Ethereum, Metamask
Languages: HTML, CSS, JavaScript, C++, Python
Web Dev: MERN Stack,Tailwind CSS,Postman API, Next.js, web3.js
Testing: Unit Testing, Fuzz Testing
